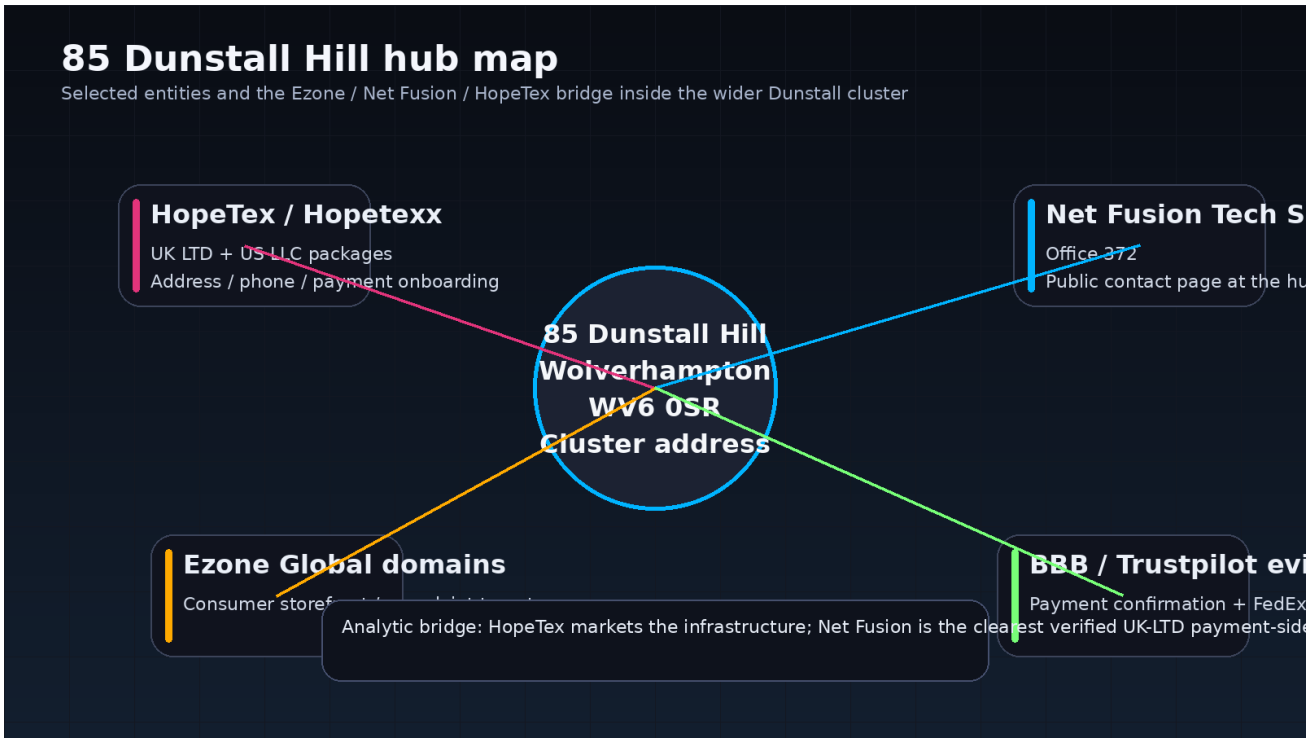
Project Dunstall Mirror — Ezone Global / HopeTex / Net Fusion bridge update

Prepared for manual repository upload • 1 April 2026

This report consolidates a narrow, evidence-led bridge between HopeTex / Hopetexx package offerings, Net Fusion Tech Services Limited at 85 Dunstall Hill, and public complaint material tied to Ezone Global domains.

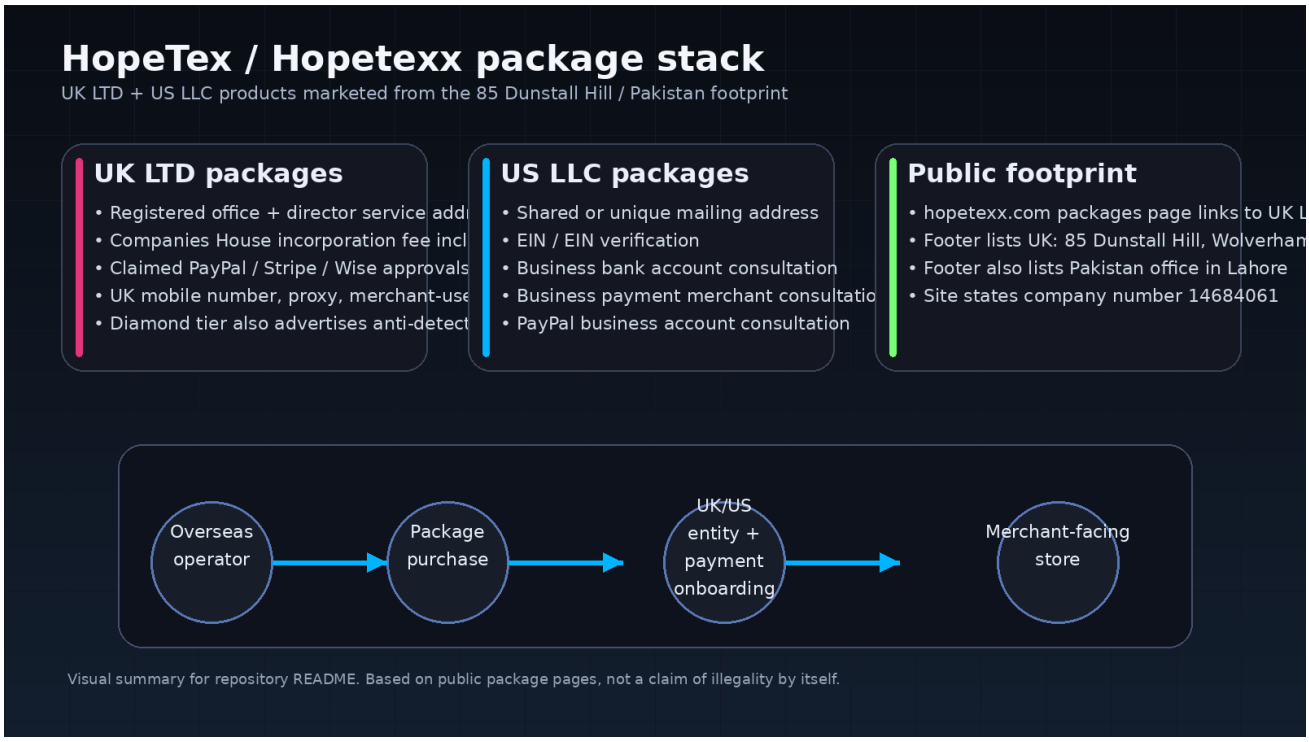


1. Executive assessment

The strongest public bridge is complaint-led but concrete: a BBB Scam Tracker report for Ezone Global states that the buyer paid through PayPal and that Net Fusion Tech Services Limited appeared on the payment confirmation. Companies House and Net Fusion's own contact page independently place that company at Office 372, 85 Dunstall Hill, Wolverhampton.

2. HopeTex / Hopetexx package model

The current HopeTex public package stack spans both UK LTD and US LLC products. The US LLC side advertises registered-agent service, shared or unique mailing address, EIN, business bank account consultation, business payment merchant consultation, and PayPal business account consultation. The UK LTD side advertises registered office, director service address, incorporation fee inclusion, company UTR/authentication code, UK mobile number, merchant-use guides, and in higher tiers claimed PayPal / Stripe / Wise approvals plus proxy / anti-detect tooling.



3. Net Fusion and the 85 Dunstall Hill address

Net Fusion Tech Services Limited is publicly registered as company number 16397389. Its Companies House record and its own contact page both place it at Office 372, 85 Dunstall Hill, Wolverhampton, WV6 0SR.

Entity	What is verified
Net Fusion Tech Services Limited	Companies House company number 16397389
Registered-office link	Office 372, 85 Dunstall Hill, Wolverhampton, WV6 0SR
Public website link	netfusiontechservices.com/contact repeats same address, phone, and admin email

4. Ezone complaint pattern

Trustpilot currently shows a 1.5 / 5 TrustScore for ezoneglobal.us with 30 reviews. Visible complaint excerpts describe PayPal payment, alternate merchant identity labels, fake or mismatched FedEx tracking numbers, wrong-address delivery, and non-responsive support. BBB complaint 1236472 separately describes a shipment sent to a different address in the same city, with a parcel weight and delivery photo that did not fit the ordered item.

5. Confidence framework

High confidence: HopeTex / Hopetexx offers the described package model; Net Fusion is at Office 372; BBB complaint 1199897 ties Net Fusion to an Ezone payment confirmation; BBB complaint 1236472 documents the wrong-address / wrong-parcel FedEx pattern.

Medium confidence: The storefront and settlement-facing merchant identity were likely not the same label in every transaction, based on complaint material mentioning Net Fusion and 'Muhammed Shafig'.

Low confidence / watchlist: Ezone Supply Partners Limited appears in the cluster dataset by name but no direct public bridge to ezonesglobal was verified in this pass.

6. Deliverables bundled with this report

README.md, the enriched cluster CSV, the relationship matrix CSV, and three PNG visuals were prepared for manual upload to the GitHub repository.
